

Prime Contractor,

Please see attached and below on the shared construction yard being managed by **Whiting-Turner**.

General Items to keep in mind:

1. The main hospital loading dock is available by appointment only although it is **highly recommended** to use the delivery of materials and equipment through building access adjacent to the laydown yard.
2. Attached is the liability waiver for using the forklift.
3. There is a low hanging power line that crosses the yard, use caution with all deliveries and equipment.
4. There is no vehicle parking allowed.
5. Gates will be open at 7 AM and closing it at the end of the day (time to be determined by activities). Special arraignments can be made through Whiting-Turner for off-hours.
6. For yard questions and scheduling contact Julian Graves at 804-402-6491 or Julian.Graves@whiting-turner.com

Project value will be transferred to the construction yard operations cost center. The Whiting Turner team will track the # of dumpsters and alert us to when that number has been surpassed. Here is the format you will need to submit with your proposal:

Grady Burn Unit	
Estimated # of dumpster pulls	
Total cost carried for dumpsters	\$
Cost carried for portable facilities	\$
Forklift	\$
OH if these items are pulled out	% of values

Whiting-Turner providing Field Engineer assigned to the following activities:

- Ensure schedule coordination among all participating GC teams.
 - Coordination to be managed physically & digitally
- Record all dumpster pull activity
 - Pulls to be tracked per activity planned and reported to GMH to support project
- Coordinate forklift utilization
 - Each GC responsible for operator
- Mobilize and coordinate porta-johns and handwash stations within construction yard
 - (1) toilet designated for females
 - (3) toilets designated for males
- Manage landscape GMH maintenance occurring at trailer site and surrounding construction zone area.
- Coordinate trash removal at worker welfare space
 - Yard manager to coordinate GC teams to send laborers to provide cleanup weekly.
- Manage site construction activities (new/adjustments to current construction zone plan).
- Manage financial operations of yard activity with GMH.
